

block grant resources to develop and improve instruction in accounting. It also aims to introduce more students to accounting and improve career awareness and workforce diversity in the field. In today's rapidly changing world, improving students' access to a STEM-based curriculum is increasingly vital to ensure they are prepared to succeed in the 21st-century workforce.

Mathematics—the “M” in “STEM”—is a critical skill that can help students unlock countless doors to high-paying, in-demand fields. One of those doors leads to the accounting profession, whose work has a direct impact on employers, employees, retirees, investors, and the global economy. Certified professional accountants, or CPAs, play a key role in providing capital markets with confidence in financial reporting. Modern accounting increasingly requires cutting-edge math and technology skills, including IT auditing, artificial intelligence, data analytics, and cyber security, to keep up with the market's needs.

Under the Every Student Succeeds Act, which is current law, school districts may use funds from the Student Support and Academic Enrichment Program to support a host of curricular and extracurricular activities that deliver a well-rounded education to students in all grade levels. Specifically, the STEM Education in Accounting Act would add “activities to promote the development, implementation, and strengthening of programs to teach accounting” to the list of courses and activities supported by this flexible block grant. Our bill would also promote high-quality accounting instruction for members of groups underrepresented in the accounting profession.

Encouraging a robust pipeline of future accounting professionals is paramount. I encourage my colleagues to join us in supporting this bill to promote accounting education, improve students' finance skills, and strengthen the pipeline of future accountants, who play such a vital role in our financial system.

#### AMENDMENTS SUBMITTED AND PROPOSED

SA 4894. Mr. SCHUMER (for Mr. MARKEY) proposed an amendment to the bill S. 1404, to award a Congressional Gold Medal to the 23d Headquarters Special Troops and the 3133d Signal Service Company, popularly known as the ‘Ghost Army’, in recognition of their unique and highly distinguished service in conducting deception operations in Europe during World War II.

SA 4895. Mr. SCHUMER (for Mr. MARKEY) proposed an amendment to the bill S. 1404, supra.

#### TEXT OF AMENDMENTS

**SA 4894.** Mr. SCHUMER (for Mr. MARKEY) proposed an amendment to the bill S. 1404, to award a Congressional Gold Medal to the 23d Headquarters Special Troops and the 3133d

Signal Service Company, popularly known as the ‘Ghost Army’, in recognition of their unique and highly distinguished service in conducting deception operations in Europe during World War II; as follows:

Strike all after the enacting clause and insert the following:

##### SECTION 1. SHORT TITLE.

This Act may be cited as the “Ghost Army Congressional Gold Medal Act”.

##### SEC. 2. FINDINGS.

Congress finds that—

(1) the 23d Headquarters Special Troops (comprised of the 23d Headquarters and Headquarters Company, Special Troops, the 603d Engineer Camouflage Battalion, the 406th Combat Engineer Company, the 3132d Signal Service Company, and the Signal Company, Special, 23d Headquarters, Special Troops) and the 3133d Signal Service Company were units of the United States Army that served in Europe during World War II;

(2) the 23d Headquarters Special Troops was actively engaged in battlefield operations from June of 1944 through March of 1945;

(3) the 3133d Signal Service Company was engaged in operations in Italy in 1945;

(4) the deceptive activities of these units were integral to several Allied victories across Europe and reduced casualties;

(5) in evaluating the performance of these units after World War II, an Army analysis found that “Rarely, if ever, has there been a group of such a few men which had so great an influence on the outcome of a major military campaign.”;

(6) many Ghost Army soldiers were citizen-soldiers recruited from art schools, advertising agencies, communications companies, and other creative and technical professions;

(7) the first 4 members of the 23d Headquarters Special Troops landed on D-Day and 2 became casualties while creating false beach landing sites;

(8) a detachment of Army radio operators under the command of Lieutenant Fred Fox joined the invasion fleet for a planned deception, Operation Troutfly, which was cancelled;

(9) Lieutenant Fox's men and their radios were instead attached to the 82d Airborne, which had lost 95 percent of its radio equipment, providing critical communications as the 82d Airborne fought its way inland;

(10) the secret deception operations of the 23d Headquarters Special Troops commenced in France on June 14, 1944, when Task Force Mason, a 16-man detachment of the 23d led by First Lieutenant Bernard Mason, arrived in Normandy;

(11) Lieutenant Mason and his men set up dummy artillery to draw enemy fire and protect the 980th Field Artillery Battalion (VIII Corps) as part of the Normandy Campaign;

(12) the rest of the soldiers of the 23d Headquarters Special Troops arrived in France in July and August of 1944;

(13) full-scale deception efforts began with Operation Elephant from July 1 to 4, 1944, in which the 23d Headquarters Special Troops covered the movement of the 2d Armored Division when it left a reserve position to go into the line between the First United States and Second British Armies;

(14) Operation Elephant was the first of the 21 full-scale tactical deceptions completed by the 23d Headquarters Special Troops;

(15) often operating on or near the front lines, the 23d Headquarters Special Troops used inflatable tanks, artillery, airplanes and other vehicles, advanced engineered soundtracks, and skillfully crafted radio trickery to create the illusion of sizable American forces where there were none and to draw the enemy away from Allied troops;

(16) the 3132d and the 3133d Signal Service Companies, activated in Pine Camp (now Fort Drum), New York, at the Army Experimental Station in March and June of 1944, respectively, were the only “sonic deception” ground combat units of the United States in World War II;

(17) soldiers of the 23d Headquarters Special Troops impersonated other, larger Army units by sewing counterfeit patches onto their uniforms, painting false markings on their vehicles, and creating phony headquarters staffed by fake generals, all in an effort to feed false information to Axis spies;

(18) during the Battle of the Bulge, the 23d Headquarters Special Troops created counterfeit radio traffic in an effort to deceive the enemy of the movement of elements of General George S. Patton's Third Army as it shifted to break through to the 101st Airborne Division and elements of 10th Armored Division in the besieged Belgian town of Bastogne;

(19) in its final mission, Operation Viersen, in March 1945, the 23d Headquarters Special Troops conducted a tactical deception operation intended to draw German units down the Rhine River and away from the Ninth Army, allowing the Ninth Army to cross the Rhine into Germany;

(20) during Operation Viersen, the 23d Headquarters Special Troops, with the assistance of other units, impersonated 2 complete divisions of American forces by using fabricated radio networks, soundtracks of construction work and artillery fire, and hundreds of inflatable and real vehicles;

(21) according to a military intelligence officer of the 79th Infantry, “There is no doubt that Operation Viersen materially assisted in deceiving the enemy with regard to the real dispositions and intentions of this Army.”;

(22) 3 soldiers of the 23d Headquarters Special Troops gave their lives and dozens were injured in carrying out their mission;

(23) in April 1945, the 3133d Signal Service Company conducted Operation Craftsman in support of Operation Second Wind, the successful Allied effort to break through the German defensive position to the north of Florence, Italy, known as the Gothic Line;

(24) along with an attached platoon of British engineers, who were inflatable decoy specialists, the 3133d Signal Service Company used sonic deception to misrepresent troop locations along this defensive line;

(25) the activities of the 23d Headquarters Special Troops and the 3133d Signal Service Company remained highly classified for more than 40 years after the war and received minimal recognition;

(26) the extraordinary accomplishments of this unit are deserving of belated official recognition; and

(27) the United States is eternally grateful to the soldiers of the 23d Headquarters Special Troops and the 3133d Signal Service Company for their proficient use of innovative tactics during World War II, which saved lives and made significant contributions to the defeat of the Axis powers.

##### SEC. 3. CONGRESSIONAL GOLD MEDAL.

(a) AWARD AUTHORIZED.—The President Pro Tempore of the Senate and the Speaker of the House of Representatives shall make appropriate arrangements for the award, on behalf of Congress, of a gold medal of appropriate design to the 23d Headquarters Special Troops and the 3133d Signal Service Company, known collectively as the “Ghost Army”, in recognition of unique and highly distinguished service during World War II.

(b) DESIGN AND STRIKING.—For the purposes of the award referred to in subsection (a), the Secretary of the Treasury (in this Act referred to as the “Secretary”) shall
